Convert AsciiDoc to LaTeX

Asciidoctor LaTeX

Asciidoctor LaTeX defines an extended syntax for the AsciiDoc markup language (AsciiDoc-LaTeX) that closely parallels LaTeX for inline and display mathematical formulas and for environments. Documents written in this extended markup language can be converted into HTML or LaTeX

https://github.com/asciidoctor/asciidoctor-latex

Asciidoctor stylesheet factory

This project is a factory for stylesheets that can be used to style the HTML generated by an AsciiDoc processor (specifically the html5 backend). In addition to being a general purpose AsciiDoc stylesheet generator, it is used to generate the default stylesheet that is bundled with Asciidoctor.

https://github.com/asciidoctor/asciidoctor-stylesheet-factory
