

FCKEditor et Cake

<http://bakery.cakephp.org/articles/view/using-fckeditor-with-cakephp>

Download FCKEditor

<http://www.fckeditor.net/download> ... todo

Adaptations

moi j'ai dû un peu bidouiller fck.php

```
<?php
class FckHelper extends Helper
{
    function load($did, $toolbar = 'Default') {
        /*foreach (explode('/', $id) as $v) {
            $did .= ucfirst($v);
        }
    */
        $serveur= $_SERVER["HTTP_HOST"];
        if($serveur=="localhost") { //serveur de développement
            $CHEMIN="cake";
        } elseif ($serveur=="truc.chose.ch"){ //serveur de prod
            $CHEMIN="tools/cake";
        }
        return <<<FCK_CODE
<script type="text/javascript">
fckLoader_$did = function () {
    var bFCKeditor_$did = new FCKeditor('$did');
    bFCKeditor_$did.BasePath = '/$CHEMIN/js/';
    bFCKeditor_$did.ToolbarSet = '$toolbar';
    bFCKeditor_$did.ReplaceTextarea();
}
fckLoader_$did();
</script>
FCK_CODE;
    }
}

/*
good?
fckLoader_$did = function () {
    var bFCKeditor_$did = new FCKeditor('$did');
```

```

bFCKeditor$_did.BasePath = '/cake/js/';
bFCKeditor$_did.ToolbarSet = '$toolbar';
bFCKeditor$_did.ReplaceTextarea();
}
fckLoader$_did();

work
var oFCKeditor = new FCKeditor('FCKeditor1');
oFCKeditor.BasePath = "/cake/js/";
oFCKeditor.Create();

*/
?>

```

et dans edit.ctp j'ai aussi magouillé:

```

<?php
#echo $javascript->link('cake/fckeditor');
echo $javascript->link('fckeditor');
?>
<div class="remarques form">
<?php echo $form->create('Remarque');?>
    <fieldset>
        <legend><?php ___('Edit Remarque');?></legend>
    <?php
        echo $form->input('login');
        echo $form->input('type');
        echo $form->input('id_source');
    echo $form->input('rem');
    echo $fck->load('RemarqueRem');
        echo $form->input('date');
        echo $form->input('id');
    ?>
    </fieldset>
<?php echo $form->end('Submit');?>
</div>

<div class="actions">
    <ul>
        <li><?php echo $html->link(___('Delete'), true),
array('action'=>'delete', $form->value('Remarque.id')), null,
sprintf(___('Are you sure you want to delete # %s?', true),
$form->value('Remarque.id'))); ?></li>
        <li><?php echo $html->link(___('List Remarques'), true),
array('action'=>'index')); ?></li>
    </ul>
</div>

```
